

A home for all SEASONS

SET ON AN ESTATE, THIS HOME EXUDES CALM AND COMFORT

ENERGY MASTER BUILDERS CC 021 863 2429

LEFT: As specialists in high-end construction, Energy Master Builders was able to create a home with the utmost attention to detail and individuality. A standout feature is the division of the house into four linked "pods". Energy Master Builders managed all aspects of the project to meet the client's specifications and design requests.

The owner loves the tranquility of this Winelands estate, so the home has been designed to make the most of the stunning mountain views and natural beauty. There is also a strong sense of community and the convenience of having "a variety of wonderful places on our doorstep," which adds to the appeal, she says.

This is a family that loves to socialise, so it was important for the home to have an easy flow. "We enjoy entertaining, and this house certainly gives us those options, whether indoors or outside." The courtyards provide ample shelter from the weather throughout the year.

An interesting feature of this home is the use of space and the separation of the house into four sections. "As we wanted to downsize, we felt we would achieve a sense of space by having separate interlinking pods, and this has definitely been the case," says the owner.

She says the house has a contemporary feel that starts with the exterior's raw stone feature wall and minimal landscaping. This is continued inside where the modern décor is striking yet inviting. Most of the rooms have tones of mustard, navy and grey - >

The new Porsche Macan offers increased performance, a sharper design and a new operating concept. The sporty flagship vehicle of the successful SUV line-up, the Macan GTS, has the responsiveness and power delivery characteristic of GTS cars. It completes the 0-100km/h sprint in 4.3 seconds when fitted with the Sport Chrono package and reaches a top speed of 272 km/h. The new Macan models offer a wide suspension bandwidth, balancing maximum suspension comfort and dynamic sports car performance. Visually, the redesigned nose with an inlay in the exterior colour emphasises the vehicle's width, making it look even more imposing. Available in 14 colours, including this Volcano Grey Metallic, the Macan will suit your personal style and lifestyle.

inspired by the statement wallpaper in the living area. The guest bedroom has a more biophilic look.

Standout features include the long entrance passageway, lit by a strip light, and the button pendant light fitting. With its considerable curb appeal, the house itself is a conversation starter, says the owner. "At night, when the exterior lights are on, the house takes on a totally different feel and is quite magical!" 🏡
